

# STEM AMBASSADOR SPOTLIGHT

**Kathryn Camp**  
Education (TAL)

## How did you select your college major? What was the biggest influence?

My favorite memories are from my time at Campus School, my teachers were a huge part of my life and I want to return the favor. I want to be a positive role model for students like my teachers were for me.

---

## What advice would you share with K-12 students who are considering your major?

I'm new so I wouldn't mind some advice myself, but I say don't go in half-heartedly. You need passion, patience, flexibility, and energy, it's a lot and you can't do that if you don't put in your all.

---

## What high school elective course do you wish you had taken to better prepare you for college?

For my last semester in highschool my schedule got all mixed up and I had to decide between AP art and early education 2, I don't fully regret choosing AP art but it would have been wiser to choose the other elective.

---

## When you aren't in class or studying, what can you be found doing in your spare time?

Drawing, traditional and digitally, it's a good way for me to clear my head. I love to listen to music while I draw too, I've been listening to a ton of Steely Dan recently.

---

## What motivates you to get out of bed and go to class every day?

Disappointing my family and myself, it's a struggle for me to wake up, who doesn't love to sleep? I don't want to waste my opportunity here and sleeping in is not going to help with that.

---

## How do you or your major make a positive impact on society/our community?

Education is a major part of the first building by blocks of a person, depending on which school they go to and if they had a good experience there. A school cannot be molded to fit a students specific needs, but a good teacher or professor can.

---

## What do you look forward to the most while being a STEM Ambassador?

I'm excited to get field experience, I'm still debating on which age group I want to work with and getting hands on experience would be a great help.
